Castellani, in Rome, has had a repuresched the south end of the bridge, It has been reported on the streets castellani, in Rome, has had a reputation for work of the same general order as Salique's, although he has schieved nothing to equal the Salique about forty five degrees on the fill at the end of the bridge, with the pilot pointed heavenward and the tender hanging down toward the bottom of the company, and that a new man will be on News, and that a new man will be on the structure gave way and the monster machine stopped at an angle of about forty five degrees on the fill at the end of the bridge, with the pilot to the company, and that the same has been accepted, says the Jerome News, and that a new man will be on the structure gave way and the monster machine stopped at an angle of about forty five degrees on the fill at the company. of course, the central idea of this jewelry is beauty and exclusiveness of design. The masters of the craft, like salique, often make the jewel, whatever it may be, with direct reference to the appearance and personality of the woman who is to wear it, and this many an endless rists of suggestive force of the water that two or three of the leaching of the hundreds of opens up an endless vista of suggestive force of the water that two or three of to the leaching of the hundre

design requires their color, but very often the semi-precious stones answer the artistic requirements better than the more costly jewels and are used by preference, without thought of the comparative cost.

If a patron is willing to put a crown's ransom of rubies into an order and Salique thinks pink topaz or lapis asuli accords better with his design, the buyer doesn't get the rubies. Moonstones are particular favorites with Salique and with many of his

the metal work and design. One of line looking ore today from the Mc- people think it is enough

the metal work and design. One of the most remarkable pieces of this art jewelry ever turned out was a comb in a design of bats flying through the filtered light of moonstones.

American designers are taking up the art jewel idea, and a new era of extravagance in jewelry is evidently at hand. Gorgeous tiaras and stomachers of diamonds will not do now. My lady must have specially designed and eccentric jewelry of which there is no duplicate, which bears the signature of a master craftsman.

Several of the New York jewelers brought home quantities of signed.

In 1909 the total value of min.

Several of the New York jewelers brought home quantities of signed.

In 1909 the total value of min.

Several of the most remarkable pieces of this captured the McCabe Extension property. The ore is rapidly growing richer in quality now as depth is made.

C. B. Hosford, owner of the Big Corral claims in the Rich Hill country and of several flowing springs at he Revenue mine, give some information concerning the mining in that region. He talked of the marvelous derelopment of the Octave mine, which a few years ago was a mere prospect but has developed into an important gold producer, and addistricts is remarkable. There are prospects everywhere, and many of

Tronsers for a Legiess Man.

"I have an aunt, a deer old soul, who does the most remarkable things in the name of charity," said a Philiadelphian. "She always has some adelphian. "She always has some starving family to attend to. She would be quite at a loss without a starving family. Sometimes I know she is dreadfully imposed upon, but the starving family. Sometimes I know she is dreadfully imposed upon, but the starving family imposed upon the starving family in the starving fa

There are three excellent prospects are exceeded by the company in the depth of the shaft shows an exceedingly irraging the trace of rock, varying from rich sturp in the San Jose group outside of the property, and the property and the

The production of copper for the first half of the current year, as re-ported by Secretary Stanton to the Copper Producers' Association, does not fulfill the expectation of an in-creased output by the mines in the United States. In fact the figures show a decrease of 1,183 tons from the production for the first six months of 1900. In explanation of this falling off it is stated that some of the was really more serious than report-ed in yesterday's issue of the Journal. ed in yesterday's issue of the Journal- tion is disproved that the high price Miner, although it is gratifying to of copper would so stimulate produc canons of elegance generally current promises to keep the fashion from becoming fatally common, says the New nine cars and caboose. The wreck exports, which have been offset by occurred at the first bridge south of the increased demand for home con-The Salique jewelry is perhaps the finest example of this new work, which is, after all, old, for it works over a deep arroyo just a short disproducing districts Arizona will be to accept; so, up to the present time, ing down the arroyo until his engine ment work following it, becomes his jewels have been obtained only by was right at the end of the bridge strikingly apparent. Then Arizona royal personages or other illustrious when it was too late to attempt to top the train.

Just as the front of the engine duction of the red metal.

opens up an endless vista of suggestive and symbolic possibility.

Then again the jewel may be made merely to carry out a conception in the mind of the artist, without reference to the future owner. Bare stones are introduced wherever the stones are introduced have been offered \$1,000,000 for their Reese M. Ling brought in a lot of to the Senator if the Copper Chief

Several of the New York jewelers brought home quantities of signed jewels in unusual designs, and have sold them rapidly. One ring for a main spractically unexplored for minerals and metals mined in Tasmania aggregated \$5,500,000. No less than a signed by a famous French workman, was a particularly good specimen, although it hadn't a hint of a precious stone about it. The ring was wrought in semblance of bark, and bore a strange, satyrlike head, that at first glance looked merely like the gnarled knot on a limb of a tree.

One Chicago woman has taken up this art jewel craft with immense success, and has orders so far in advance that she says it will be impossible for her to promise anything before 1903,

Tronsers for a Legiess Man. sharing family. Sometimes I know John Dessart and R. Allyn Lewis. A few thousand shares of stock are still to be had at 25 cents a share, and if the Pennsylvania capitalists who now own the mine sank more than a half million dollars in developing the Octave from a prospect. So much consider was a dollar of remaining the part of trousers for? I asked. 'To give to a poor many who hasn't any legs,' she refor? I asked. 'To give to a poor man who hasn't any lega,' she replied. It was all I could do to keep from laughing in her face, but I controlled myself and said: 'Why, yes; I can let you have an old pair of trousers, and an old pair of shoes, too!' Even then the absurdity of it didn't strike her. 'Oh, you are so good!' she exclaimed. And she went away with the trousers and shoes for the poor man who didn't have any lega."—Philadelphia Record.
